Project Title: Angelou Eramis Portfolio

Objectives:

- **User-focused design**
  - Create a visually appealing and user-friendly design to showcase my portfolio effectively.
  - Make sure it is responsive to offer the best possible viewing experience on a range of devices.

- **Navigation and Structure:**
  - Use a horizontal bar to create a simple and straightforward navigation menu that makes it easy to navigate between the various parts (Home, About, Services, Contact).

- **Typography:**
  - Use a combination of font family, such as "Poppins" and "sans-serif".
  - Use different font sizes and weights to provide distinction to parts like header and body content.

- **Section Design:**
  - Use varied background and padding to set off sections such as "Home," "About," "Services," and "Contact" to create a visually appealing layout.

- **Social Media Integration:**
  - In the "Contact" section, add a social media section with connections to Facebook, Instagram, and Gmail that have stylized buttons.

- **Implementation of Design:**
  - Make sure that design aspects including font styles, color schemes, and spacing are all consistent.

- **Testing:**
  - Check to make sure all of the navigation links point to the appropriate areas and function properly.

This portfolio website attempts to provide an engaging and smooth user experience while effectively showcasing my skills and work by fusing design aesthetics with a user-centric approach. The portfolio will continue to perform well with regular upgrades and adjustments.
